

ORGANIC COTTON

Material sheet

COMPOSITION / FEATURES

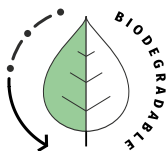

- 100% of the yarn consists of natural textile fibers from organic farming
- GOTS (Global Organic Textile Standard) certified

Organic cotton is a natural material, whose use leads to a reduction in impacts related to CO₂ equivalent emissions. The organic cotton used by Riri is certified and guarantees that:

- natural textile fibers come from organic farming;
- neither toxic or harmful nor GMOs are used;
- there is a control and certification system for the whole supply chain;
- there is full compliance with social criteria.

The organic cotton is available on the following products:

- Metal, Simmetrica, Solid/Star chains
