For any further information, please ask to our sales representatives.

What makes it Sustainable:

- **Components**: Mono-material metal
  
  Each component is entirely made of stainless steel conferring a high degree of recyclability to the INOX Jeans Button. A rivet with the same characteristics is available.

- **Surface treatments**: Reduced water & energy consumption
  
  Thanks to the inherent characteristics of Stainless Steel, the INOX Jeans Button is produced without any galvanic treatment.

- **Certifications**: Product certified
  
  Oekotex Standard 100 – Product Class I is an international accreditation of a responsible chemical management.

- **Technics**: Resistance & robustness
  
  Thanks to the high degree of durability of stainless steel, the INOX Jeans Button has a longer life cycle.
